GitHub Url: <https://github.com/vishwas21/DS561-vishwas-assignments>

---

Steps to run the First app locally:

1. Download the code from the above link.
2. Install all the python dependencies using the command `python pip3 install -r requirements.txt`.
3. We can run the python code using the command `functions-framework-python --target ds561_fileRequest_http --debug`
4. Now this function can be tested using the browser using the link <http://localhost:8080>

Steps to run the Second App:

1. Download the code if you have not already downloaded using the git clone command
2. Install all the python dependencies using the command `python pip3 install -r requirements.txt`.
3. Run the Consumer Code using the command – `python3 consumerApp.py`

Commands used to deploy the Cloud Function:

```
gcloud functions deploy ds561-python-http-server \
--gen2 \
--runtime=python311 \
--region=us-central1 \
--source=. \
--entry-point=ds561_fileRequest_http \
--trigger-http \
--allow-unauthenticated \
--memory=256MB \
```

```
--max-instances=83
```

Command to describe the Cloud function which was just deployed:

```
gcloud functions describe ds561-python-http-server \
--region us-central1
```

Output:

```
buildConfig:
build: projects/776935284294/locations/us-central1/builds/2f374b1b-59d1-4ca5-a2d6-a0297a26c471
dockerRegistry: ARTIFACT_REGISTRY
entryPoint: ds561_fileRequest_http
runtime: python311
